

Sanofi Vitry-sur-Seine Biotech Campus

9 Quai Jules Guesde

94400 Vitry-sur-Seine, France

Letter of Reference

To whom it may concern,

Please accept my recommendation of Yohan Nzali Tchouangue (born on 17.11.2000). I have worked with him during his internship with us in the Engineering & Maintenance department from 13.05.2024 to 18.10.2024. In addition, I also had the pleasure of supporting him throughout the development of his Bachelor thesis, which was conducted in cooperation with Sanofi.

Sanofi is a global pharmaceutical leader, headquartered in Paris since 1973. Operating in over 100 countries with more than 100,000 employees, Sanofi specializes in therapeutic areas such as vaccines, oncology, and immunology, with a strong focus on research and development (R&D). The company invests heavily in AI, machine learning, and genomics to advance medical innovation. Sanofi's reputation is built on adherence to regulatory standards and its use of data-driven strategies to shape its operations.

The Vitry-sur-Seine site near Paris is a key biopharmaceutical hub. Specializing in biologics and oncology, Vitry was the first site to manufacture monoclonal antibodies at an industrial scale for cancer treatment. It is known for its Good Manufacturing Practices (GMP) compliance and plays a vital role in bioproduction. Vitry's strength in balancing compliance with process optimization has positioned it as a leader in pharmaceutical digitalization and innovation in the life sciences.

His primary duties included the following:

- Developed and implemented maintenance strategies for risk minimization in antibody production facilities, focusing on regulatory compliance and efficiency improvements.
- Introduced a risk assessment methodology (e.g., "FMEA") for proactive risks identification in maintenance operations and ensure robust risk mitigation strategies.
- Conducted benchmarking analyses across international sites, identified best practices and provided strategic recommendations for optimization.
- Conducted gap analyses and identified deviations in maintenance processes compared to global standards, ensuring alignment with international regulatory requirements.
- Performed risk analyses based on historical maintenance data and inspection protocols to anticipate potential issues and identify optimization potential.
- Managed Change Control processes, ensuring all modifications in the production environment complied with regulatory and quality standards.
- Prepared and updated compliance reports to ensure that all procedures met regulatory requirements in line with Sanofi's global standards.

Mr. Nzali Tchouangue was able to adapt himself for working life and created quick links with all his colleagues, even if he had to work in a different language from his native one. He has excellent comprehension skills, a vast wealth of experience for an intern and has already been able to build up excellent specialist knowledge in the field of Strategy, Compliance subjects and Risk Management. Particularly noteworthy is his highly developed analytical thinking, making him an always independent and balanced employee even in the most challenging situations.

Mr. Nzali Tchouangue always worked very prudently, conscientiously, and consistently accurately. He convinced by his absolute reliability. Even for unforeseen problems, Mr. Nzali Tchouangue always found the right solutions, which he, if necessary, always put into practice successfully. Furthermore, Mr. Nzali Tchouangue was consistently eager to take on new challenges, proactively seeking opportunities to test his skills and grow. His strong drive and determination to generate a lasting impact were evident in every aspect of his work. Overall, he always fulfilled the tasks assigned to him to our complete satisfaction in every respect.

Mr. Nzali's personal conduct was always impeccable. Due to his absolute collegiality and omnipresent helpfulness, he was absolutely appreciated and always very popular among superiors and colleagues. He was a model intern to our company, and I can give him the highest possible recommendation to any future employer. We wish him continued success and all the best for his future career.

Florian Teyper
Maintenance Manager
Sanofi AG
