

Internship: AI-Driven Growth Engineer

Build the AI-powered growth engine that scales the leading independent energy management software provider from the DACH region across all of Europe.

START

Immediately — first come, first served

DURATION

10 weeks – 6 months

LOCATION

Highlight Towers Munich, 31st floor — or remote

REPORTS TO

CEO (directly)

OPIT's AI-focused energy management software **e3m (e3m.ai)** monitors the energy consumption of **15,000+ properties** daily for **1,000+ customers** — including Coop, Migros, Edeka, Carrefour, Swisscom, Volkswagen and Zurich Airport. We are now scaling across all of Europe, and we do it the modern way: with AI agents, automation pipelines and data — not with a 20-person sales team. You will build that machine with us.

WHAT YOU WILL BUILD

- ▶ **AI outbound engines:** n8n workflows that research prospects, enrich contact data (Hunter, Zefix, LinkedIn) and run personalized cold email campaigns across European markets.
- ▶ **Growth experiments:** landing pages, A/B tests and conversion funnels for e3m.
- ▶ **Market intelligence:** scrapers and LLM pipelines that map exhibitors, competitors' user bases and untapped market segments across Europe.
- ▶ **Trade fair campaigns:** pre- and post-event automation for Eletrotec + EM-Power (São Paulo), Smart Energy Week (Tokyo), WETEX (Dubai) and Enlit Europe (Vienna).

WHAT YOU BRING

- ▶ You are fascinated by watching companies grow — and have always wanted to be on the front line making it happen.
- ▶ Hands-on drive — you ship, you don't present slides about shipping.
- ▶ Comfort with LLMs and prompt engineering (Claude, GPT) as daily tools.
- ▶ Basic technical skills: APIs, HTML/JS or Python, ideally n8n/Zapier/Make.
- ▶ Good written English; German is a strong plus.

WHAT YOU GET

- ▶ Work directly with the owner (Forbes 30 Under 30) — zero layers.
- ▶ Real ownership: your campaigns go live to real markets, immediately.
- ▶ A crash course in vertical B2B software and AI-first go-to-market.
- ▶ Uncapped bonus for every new customer you win — if you deliver, this becomes an extremely well-paid internship.
- ▶ Flexible remote setup, fast decisions.
- ▶ Strong performance can lead to a permanent role.

HOW TO APPLY

No cover letter needed. Send a short email with your CV — or better: something you have built (a workflow, a scraper, a landing page, a side project) — to p.nessensohn@vierwaldsoftware.ch, subject "AI Growth Intern" — or reach Peter directly at **+49 1578 5021751** (WhatsApp works too). We reply within 12 hours.
