

Internship certificate

Mr Carl Hultgren completed a voluntary student internship in the field of health policy at our company from 2 June 2025 to 20 June 2025.

The IGES Institute is a leading private research and consulting institute for issues relating to European health systems, market access and healthcare in Germany and forms the core of the IGES Group. The IGES Group employs a total of more than 200 experts from the fields of medicine, economics, natural and social sciences, pharmacy, statistics and information technology. The IGES Group now comprises 13 companies in eight European countries.

The health policy division deals with selected health policy issues in expert reports, studies and project reports, including the supply situation in specific outpatient or inpatient service areas, partly with a regional focus. Its clients are mainly federal and state ministries, foundations, associations and self-governing bodies in the healthcare sector.

Mr Hultgren's responsibilities included the following tasks:

- ◆ Conducted quantitative analysis and in-depth research in Excel on health policy issues with an international scope
- ◆ Prepared and designed PowerPoint presentations for internal and external stakeholders on various healthcare policy topics
- ◆ Developed an Excel-based data-cleaning model for cross-country comparisons of healthcare indicators
- ◆ Drafted concise and structured summaries of client meetings for internal documentation
- ◆ Composed management reports and executive briefings on current health economics topics for the CEO
- ◆ Independently designed and implemented a VBA macro to automate the extraction and formatting of publicly available datasets

Thanks to his great openness to new topics, Mr Hultgren quickly familiarised himself with the projects in the health policy division. He always demonstrated great commitment, initiative and dedication in the performance of his duties. He always carried out the tasks assigned to him
