Strategic Projects Intern Case Study

1) International Expansion Part

As part of our growth agenda, we are looking to expand internationally. Taxfix is already live in Germany, Italy, and France and is actively exploring new markets as well.

You just joined Taxfix and the team asks you to look at the following ten countries: Australia, Austria, Brazil, Canada, India, Mexico, Netherlands, Spain, Turkey, UK (alphabetical order).

Consider the **three countries** we assigned to you via email and argue which country would be the best to be assessed in a full project. For this, define a clear set of criteria and underline why you chose them. Please then compare the three countries along these criteria and demonstrate the conclusions that lead to your recommendation.

Please prepare a short slide deck to illustrate your recommendation.

2) Product Part

On your second day, you discuss the global competitive landscape with our Strategy team. You learn about TurboTax, a major tax prep player from the US, and they ask you to undertake an analysis of their current products and services. Once you have a better understanding of their offerings, please pick one of their products/services/features that you think is worthwhile for Taxfix to explore in more depth. Please explain why that is the case. In the course of your analysis, make sure to answer the following questions:

- Which target market does it serve?
- Which customer need does it address?
- What are the aspects it does well, and what could be improved?

Please prepare a summary of your assessment on max. 3 slides.
