≡ Aon // Numerical Reasoning

You have completed the examples and should now have understood how this test works. If not, please go back to the instructions and the examples by pressing 'introduction'.

Please note:

- The test includes 18 tasks. You will be given 6 minutes to complete these 18 tasks. Most people cannot complete all 18 tasks in 6 minutes.
- The test cannot be interrupted once you have started it.
- The test requires you to work quickly and accurately.
- The information on the data sheets will not change during the test.
- Each statement relates to only one data sheet, you need to find and refer to that data sheet. If not otherwise stated, all figures are related to Euro-Bank.
- Every task has only one correct answer. You may change your answer by highlighting it.
- The test will end automatically after 6 minutes. You can stop the test before this if you have answered all questions.
- The time will start to count automatically when the first task appears on the screen.

Press 'next' in order to start the test.
