

## Letter of Reference

To whom it may concern,

Please accept my recommendation of Ms. Berfin Cosar. I had the pleasure of working with her during her internship at our Primary Health Organisation (PHO) from 06/01/2025 to 31/03/2025.

Her primary duties included the following:

- Independently explored and cleaned complex patient-level data extracted from the PHO's database for use in advanced quantitative analyses.
- Conducted detailed statistical evaluations in Stata to assess immunization coverage trends across demographic groups and geographic areas.
- Identified systemic disparities in vaccination uptake and modeled practice-level variation to inform targeted intervention strategies.
- Translated data insights into strategic, actionable recommendations aimed at improving vaccination outreach and health equity.
- Engaged with clinicians, senior management, and external decision-makers to validate findings and align analytical focus with operational realities.
- Consolidated all results into a comprehensive dossier, and presented key insights and recommendations to the PHO's executive leadership team.

Ms. Cosar consistently demonstrated excellent and versatile analytical skills, which she applied confidently and purposefully across all phases of her project. She possesses strong comprehension abilities and quickly developed a deep understanding of complex health data structures and policy contexts. Particularly noteworthy is her highly developed analytical thinking, which enabled her to work independently, systematically, and effectively even in challenging situations.

She impressed with her exceptional commitment, initiative, and willingness to take on responsibility. Even under tight deadlines and a demanding workload, Ms. Cosar always delivered precise, well-structured, and high-quality results. Her reliability and diligence were outstanding throughout the internship. She approached all tasks with care and a results-oriented mindset, often finding practical solutions to emerging challenges.

Ms. Cosar's conduct was exemplary at all times. Her respectful, collegial, and cooperative nature made her a valued and well-liked team member. She was able to communicate confidently and professionally with colleagues at all levels, including clinical leaders and senior executives.

I am confident that Ms. Cosar will be a great asset in any data-driven or strategic role. I can give her my strongest recommendation and wish her continued success in her academic and

professional career.

Sincerely,

[Your Supervisor's Name]
