## Letter of recommendation for Moritz Klapczynski

Dear Madam or Sir,

I am pleased to write this reference letter supporting Mr Moritz Klapczynski's application for the MSc in Management at the Frankfurt School for Finance and Management. In my opinion, Mr Klapczynski is a highly talented and hard-working student who impresses with his ability to think creative and innovative and his active class participation.

I know Mr Klapczynski from my course "corporate finance" in 2017/2018, which he completed among the top 5-10% students. Last year I supervised his bachelor thesis. Therefore, I had the chance to follow Mr Klapczynski's progress as a student from the beginning of his studies till the very end. In his thesis, Mr Klapczynski analyzed private debt as an alternative for bank financing, especially for SMEs. The analysis rests on a good scientific basis and uses very well identified critical success factors for addressing the research question in a well-structured way. From my classes, the thesis's supervision, and personal communications, I can confirm that he has a strong finance and business knowledge and a good understanding of the scientific methodology. He can explain his thoughts and his conclusions clearly and confidently. He also is able to apply theoretical concepts to practical problems and to use his already significant practical experience from investment banking/M&A, strategy and, company financing to reach high-quality solutions. To deepen his understanding of new and sustainable business models and take on an internal consultant's perspective, an internship at Axel Springer Digital will follow. His CV clearly demonstrates Mr Klapczynski's consistent and

strong interest in the areas of finance and strategy and for the practical application of learned content.

Apart from his academic career, Mr Klapczynski also shows strong social abilities. He is the captain of the field hockey team TC Blau Weiss Berlin and the leading figure of the team, on and off the court. He has also been active as a youth hockey coach since 2008 and been very successful in this area. As a competitive athlete, time has taught him to appreciate teamwork, assertiveness, critical thinking, and time management. No doubt these experiences will prove helpful both in lectures and in the workplace, adding value to himself and his environment.

Considering his hard work and intellectual aptitude, I expect that Mr Klapczynski will very well contribute to the Frankfurt School for Finance & Management class discussions. Having been a professor at FS for five years myself, I am convinced that the MSc in Management is the right degree for him to support his intended career path in the complex field of finance, strategic management and technology. Therefore, I strongly recommend Mr Klapczynski for this masters' degree at the Frankfurt School of Finance & Management.

If I can provide any further or more specific information, please feel free to contact me.

Yours sincerely

Prof. Dr. Ursula Walther
