Schaeffler

SCHAEFFLER

The Vision

Next generation corporate finance
Transforming ways of working for tomorrow

The Purpose

AI-powered deal execution

Receive company intelligence, identify potential buyers and targets

Specialized **intelligence** for investment banking teams

Product Overview

Our solution is designed specifically for investment banks to enhance M&A execution and origination through intelligence and collaborative workflows.

By combining granular **company intelligence** with purpose-built **workflow features**, it supports teams to efficiently generate long- and short lists of potential buyers or new deal opportunities.

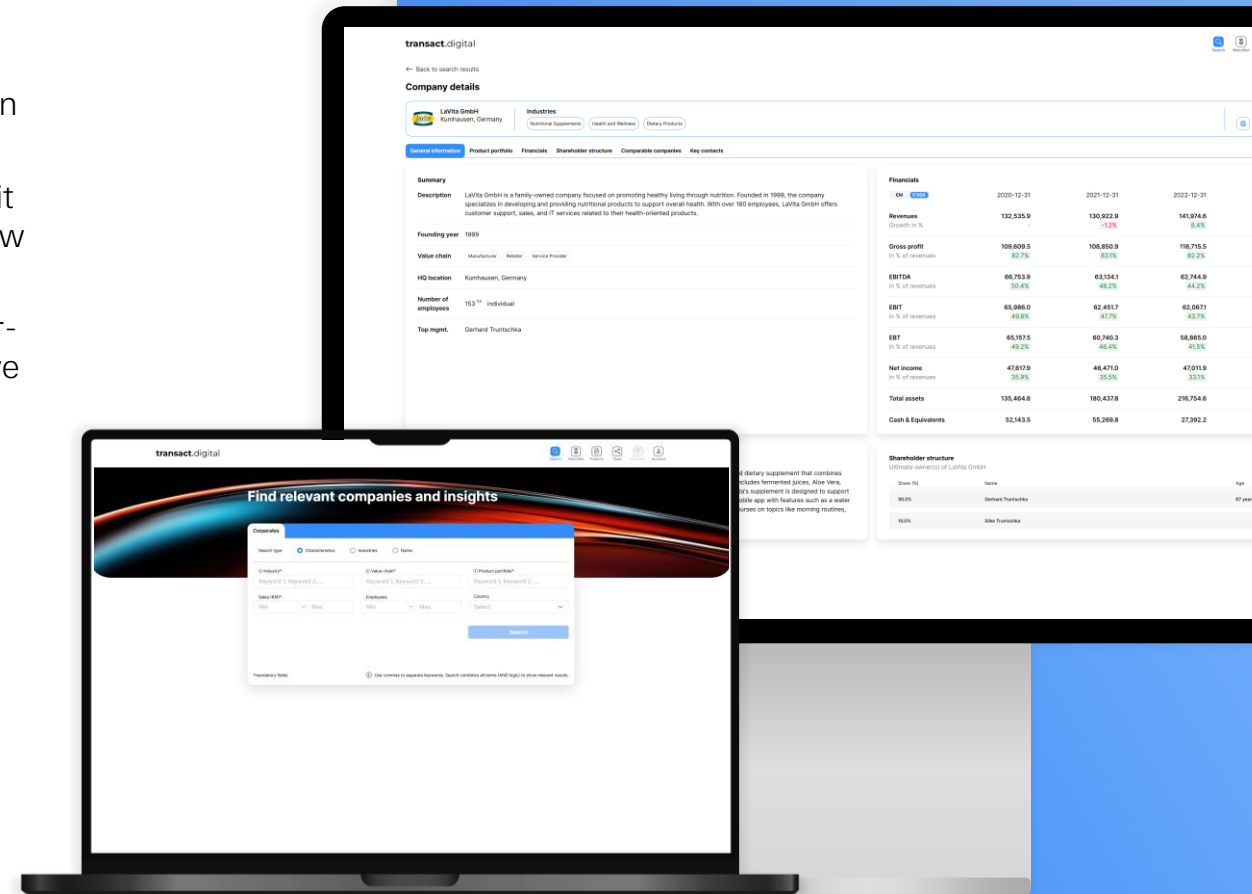

Whether you're preparing a market deep dive, advising a client, or targeting founder-owned businesses, our platform equips your team with the insights and tools to drive differentiated advice and win mandates faster.

Company Intelligence
